Motion HR to Host Oracle E-Business Suite Human Capital Management Applications

OHUG 2010 Las Vegas

LAS VEGAS, June 14, 2010—Motion HR, LLC, the global HRIT consulting services company, today announced that it has become an Oracle Human Resources BPO Services Partner to deliver subscription-based services on Oracle’s Enterprise Human Capital Management (HCM) software suite.

“Oracle’s recognition of our capabilities enhances our commitment to the Oracle E-Business Suite HCM technology platform,” said John Pask, managing member of Motion HR. “This opportunity also brings value to our customers through best-in-class technology, process and cost-effective solutions. We believe that through our CloudHCM platform we can effectively enhance the HCM service delivery for our clients while improving the cost of supporting and maintaining software, services and ROI to the businesses we serve.”

Motion HR, LLC has been at the forefront of innovation with the CloudHCM Oracle E-Business Suite platform by offering additional services such as call center support, pre-built Oracle HCM modules, and third-party integration toolsets that minimize cost and support for its clients.

Earlier this year, Motion HR became the first Oracle partner to bring a hosted client live on Oracle Performance Management 12.1 and integrate it with the client’s Oracle HR system running Oracle E-Business Suite Release 11.5.10.

“We are delighted to have Motion HR in our ‘BPO Powered by Oracle’ program,” said Tibor Beles, Oracle’s vice president of Business Process Outsourcing. “Motion HR’s management talent, HR process expertise and industry knowledge has brought great vision, resulting in an innovative, integrated HR service offering based on Oracle HCM software.”

About Motion HR, LLC
